bac_quick_report

Generated: 2025-09-08_00-15-35

Executive Summary This report details the results of a Broken Access Control (BAC) assessment performed on <https://juice-shop.herokuapp.com/#>. The assessment utilized a quick probing approach based on a fallback dictionary due to the absence of dynamically discovered links. Therefore, the findings should be considered preliminary and may not represent the complete security posture of the application. The assessment identified a total of 15 findings, with 9 identified as potentially vulnerable. The 'Vulnerable' status suggests direct access to sensitive URLs without proper authorization checks. The 'Info' status implies that the URLs exist but require further investigation to determine their security implications. It is highly recommended to enable JavaScript rendering and/or provide authentication details during future assessments to achieve more comprehensive and accurate results. Immediate attention should be given to the identified vulnerable URLs, implementing appropriate access control mechanisms to prevent unauthorized access. Target URL: <https://juice-shop.herokuapp.com/#> Total Tests: 2 Total Findings: 15 Vulnerable: 9 Info/Needs Review: 6

Executive Summary

This report details the results of a Broken Access Control (BAC) assessment performed on <https://juice-shop.herokuapp.com/#>. The assessment utilized a quick probing approach based on a fallback dictionary due to the absence of dynamically discovered links. Therefore, the findings should be considered preliminary and may not represent the complete security posture of the application.

The assessment identified a total of 15 findings, with 9 identified as potentially vulnerable. The 'Vulnerable' status suggests direct access to sensitive URLs without proper authorization checks. The 'Info' status implies that the URLs exist but require further investigation to determine their security implications.

It is highly recommended to enable JavaScript rendering and/or provide authentication details during future assessments to achieve more comprehensive and accurate results. Immediate attention should be given to the identified vulnerable URLs, implementing appropriate access control mechanisms to prevent unauthorized access.

Target URL: <https://juice-shop.herokuapp.com/#>

Total Tests: 2

Total Findings: 15

Vulnerable: 9

Info/Needs Review: 6

Detailed Findings

Note: No dynamic links discovered; results based on fallback dictionary & quick probes. Consider enabling JavaScript rendering or providing authentication to improve coverage.
