

SSL/TLS Configuration Report

juice-shop.herokuapp.com_ssl_tls_2025-09-08_19-30-08

Executive Summary

This report outlines the SSL/TLS configuration of juice-shop.herokuapp.com as of 2025-09-08_19-30-08. The assessment identified one low-risk finding related to the use of a broad wildcard certificate. Modern protocol support (TLSv1.2 and TLSv1.3) is enabled, but older, insecure protocols are disabled, which is a positive security practice. Mitigation steps are provided to address the identified finding and improve the overall security posture.
