CSRF Protection Add CSRF tokens to all state-changing operations, implement SameSite cookie
attributes, and validate origin headers. Regular Security Testing Schedule regular security
assessments, implement automated security testing in your CI/CD pipeline, and stay updated with
latest security best practices. Security Headers Implement security headers like HSTS,
X-Frame-Options, X-Content-Type-Options, and Content Security Policy to enhance overall security
posture. ■ Generated by Advanced Security Scanner | Report ID: 2025-09-09_11-04-58 This
automated security assessment should be complemented with manual security testing.
