

Security Assessment Report

Generated from index.html

■ Security Assessment Report

Comprehensive Web Application Security Analysis

■ Scan Details

■ Security Overview

■ Security Recommendations

Immediate Action Required

Critical vulnerabilities have been identified that require immediate attention. Prioritize fixing high-severity issues and consider implementing additional security controls.

Secure Database Interactions

Use parameterized queries or prepared statements, implement input validation, and apply the principle of least privilege for database accounts.

Regular Security Testing

Schedule regular security assessments, implement automated security testing in your CI/CD pipeline, and stay updated with latest security best practices.

Security Headers

Implement security headers like HSTS, X-Frame-Options, X-Content-Type-Options, and Content Security Policy to enhance overall security posture.

■ Generated by B-Secure Scanner | Report ID: 2025-09-09_00-57-49

This automated security assessment should be complemented with manual security testing.
