

CSRF Report

juice-shop.herokuapp.com_csrf_2025-09-08_00-21-41

Executive Summary

This report details the results of a Cross-Site Request Forgery (CSRF) vulnerability assessment conducted on juice-shop.herokuapp.com. The assessment was performed on 2025-09-08 at 00:21:42, focusing on 1 potential action across 1 attack vector. While a potential issue was identified, no exploitable CSRF vulnerabilities were confirmed during this assessment. An enumeration error was encountered during one scan, indicating a potential need for further investigation.

Report Details

Generated: 2025-09-08 00:21:42

Base URL: <https://juice-shop.herokuapp.com/#>

Total Actions Tested: 1

Total Attack Vectors: 1

Overall Status: No CSRF vulnerabilities exploited.

Detailed Results

Recommendations

Despite no vulnerabilities being exploited, the enumeration error indicates a potential area for further investigation.

Address Enumeration Error: Investigate the "lxml" parser library error. Ensure the necessary dependencies are installed and configured correctly to improve the accuracy of future scans.

Regularly scheduled scans: Continue to execute CSRF scans to proactively identify and address potential vulnerabilities as the application evolves.
