Broken Access Control Report

Site: https://httpbin.org

Date: 2025-09-05_23-55-41

Executive Summary This report summarizes the Broken Access Control (BAC) vulnerabilities identified during a scan of https://httpbin.org on 2025-09-05_23-55-41. A total of 8 tests were performed. While no vulnerabilities were directly identified, several areas require attention to ensure robust access control mechanisms. Note: WARNING: No links found during crawling. This site may require login, heavy JavaScript rendering, or uses strong client-side protections. This limitation affects the accuracy of the tests.

Executive Summary

This report summarizes the Broken Access Control (BAC) vulnerabilities identified during a scan of https://httpbin.org on 2025-09-05_23-55-41. A total of 8 tests were performed. While no vulnerabilities were directly identified, several areas require attention to ensure robust access control mechanisms.

Note: WARNING: No links found during crawling. This site may require login, heavy JavaScript rendering, or uses strong client-side protections. This limitation affects the accuracy of the tests.

Summary Total Tests: 8 Total Findings: 13 Vulnerable: 0
